

*"I just want a mild distortion..."*

# Don't look at me then..!!

## J.A.K. AUDIO STAGGER ANALOG AIR, HEAT & PUNCH

The **J.A.K. AUDIO STAGGER** is a Badass analog distortion & tone shaping channel strip. Built around a fader amplifier with boost, it allows you to shape your sound to achieve the colour you are looking for.

**LIMITER WITH HISTORY:** Based on the "Shure Level-loc" limiter, this limiter was the secret weapon to add "air" to overheads. By adjusting both "Distance" (threshold) and Release, you can achieve interesting effects.

**HEAT & PUNCH:** With the **Soft Clipper** you can model the transients of your sound and give it a harsh or punchier tone. **INSTRUMENT INPUT:** Plug your Bass or electric guitar and start modelling your own sound!

**FADER & BOOST:** Both send Fx levels are mixed back to the fader amplifier. Crank-up the **BOOST**, to achieve some warm distortion tones that you will love like crazy!

**J.A.K. AUDIO STAGGER,**  
Analog Air, Heat & Punch!
